Beginning Tuesday, September 11, 2012, the contractor will close the westbound outside lane of Robinson Street between Stubbeman Avenue and Newton Drive in order to construct the retaining wall and the curb on the west end of the project. The lane will be reopened during the first week of October. One lane will be open for westbound traffic and both lanes will be open for eastbound traffic on Robinson Street. The intersection of Robinson Street and Flood Avenue will not be affected by this lane closure. Additional questions may be directed to John Clink, Capital Projects Manager, at 366-5424.

The Robinson Street Underpass Project from 500 feet west of Flood Avenue to 500 feet east of Stubbeman Avenue is a \$25 million street improvement project approved by the Norman voters as part of the 2005 Bond Election. Construction began on the project on Monday, June 14, 2010. The Oklahoma Department of Transportation is responsible for the construction of the project. The prime contractor is Manhattan Road and Bridge of Oklahoma City.
